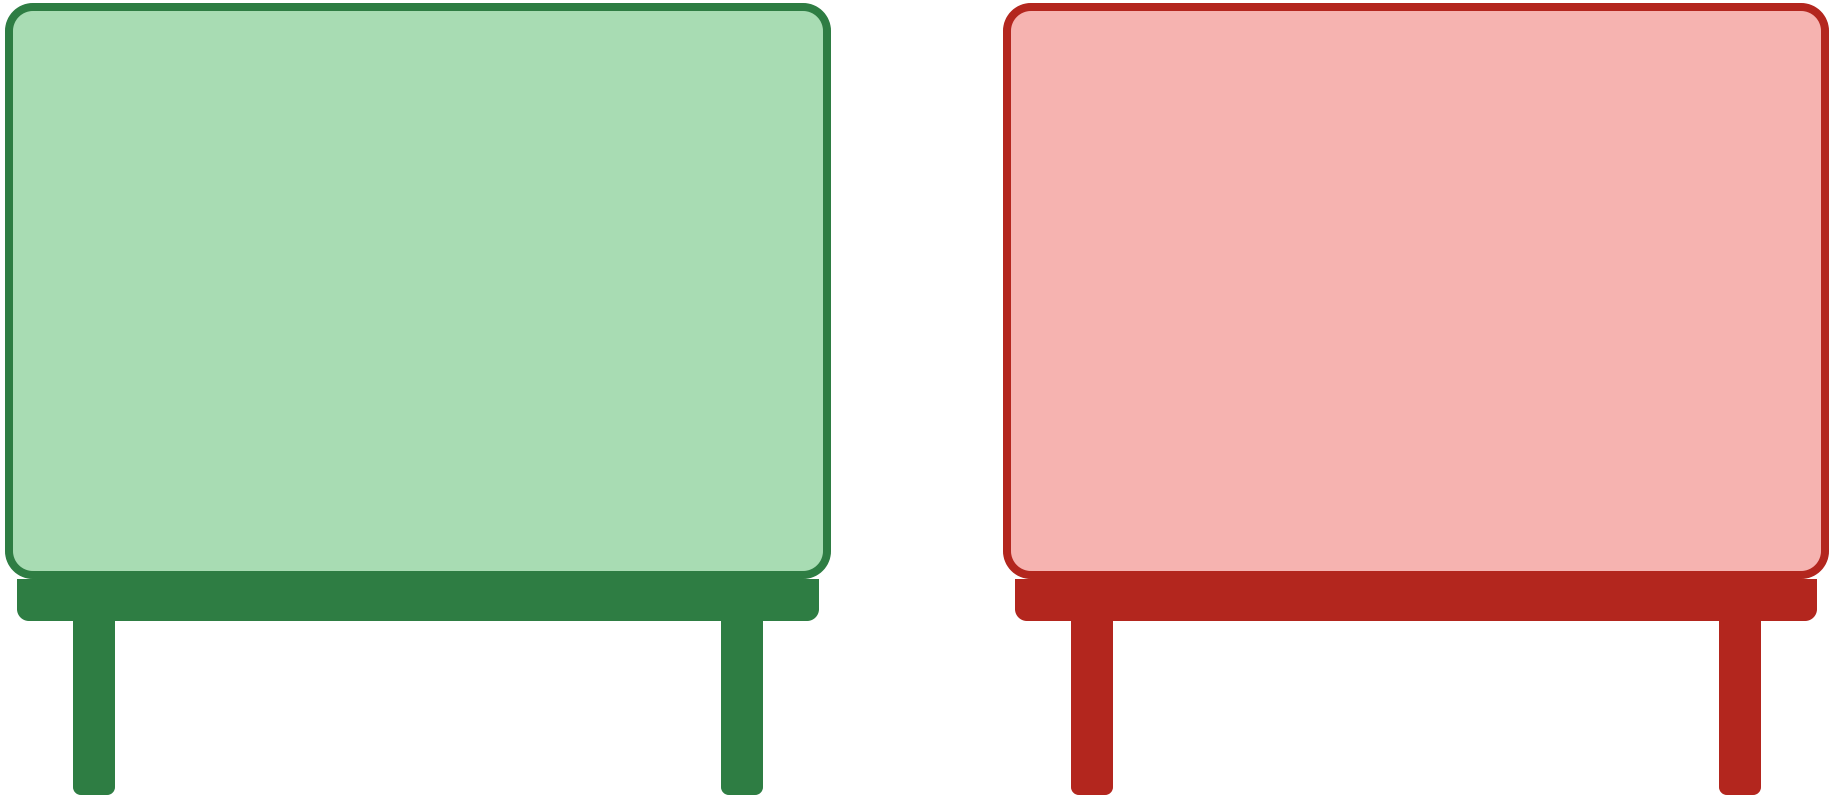
Bowls on Two Tables

Six bowls of cereal are placed on two tables. Draw a picture to show a way that six bowls might be placed on two tables. Write the equation that matches your picture. Find more ways and write the equations. Finally, tell how many ways you think there are to place six bowls on two tables.



Task from Van de Walle, Karp, & Bay-Williams, *Elementary and Middle School Mathematics: Teaching Developmentally*. For TCE 318P class use.
